FOREWARD

The "Basic Animal Husbandry and Fisheries Statistics" has been an annual publication of the Department of Animal Husbandry, Dairying and Fisheries. It contains useful estimates such as that of major livestock products viz. milk, egg, meat and wool; different species of livestock population by age and sex; gross value of output, diseases, export, import and related infrastructure etc. Fisheries statistics and other related matter have also been added. Keeping in view the importance and its utility for policy purposes, the book is being published annually. The painstaking efforts put in by Shri S.K. Das, Adviser (Statistics) and his team in preparing and finalizing this document is appreciated.

It is our hope that this publication, the 15th of the series, will be useful for administrators, policy planners, veterinarians, scientists, research organizations, Government agencies and other involved in the development of the livestock sector.

PREFACE

The “Basic Animal Husbandry and Fisheries Statistics-2014” contains production estimates for milk, egg, meat and wool upto the year 2012-13 which are based on “Integrated Sample Survey” undertaken on regular basis by States/UTs under the aegis of Department of Animal Husbandry, Dairying & Fisheries, Ministry of Agriculture. It also contains fisheries statistics including estimates on fish and fish seed production. The provisional production estimates of major livestock products i.e. milk, eggs, meat and wool for 2013-14 is also included in this publication. The information on livestock population as per the Livestock Census- 2007 and 2012 are also available in this publication.

Collection and compilation of a voluminous data to develop this document is a gigantic task that involved sincere and dedicated efforts of all States/UTs and Central Government’s Officer/Officials are appreciated and acknowledged. Appreciations are also due to Shri Ajith Kumar N, Director, Shri Manoj Kumar Verma, Deputy Director, Shri Alok Nigam, Assistant Director and his team for examining the accuracy of data and its timeliness.

Though extreme care has been taken in the preparation of this report, possibility of some errors and omissions, however, cannot be ruled out. I would be glad to have comments and suggestions for its improvement in future.

SALIENT FEATURES

1. A Brief Technical Note

1.1 Integrated Sample Survey: The production estimates of major Livestock Products (MLP), namely, milk, eggs, meat & wool are derived on the basis of annual sample survey being conducted under the Central Sector Scheme “Integrated Sample Survey”. The scheme is implemented by Department of Animal Husbandry, Dairying & Fisheries, Ministry of Agriculture through State Animal Husbandry Departments. All the States and Union Territories are implementing the Scheme. Under the Scheme, Central Assistance to the tune of 50%-100% of the expenditure on salary for the entitled posts is provided to the States (ONER) and the Union Territories respectively. For NER States the salary component is on the ratio 90(Centre):10(State). Further, 100% Central Assistance is also provided for (i) TA/DA to the Enumerator and Supervisor for the field work at a prescribed rate (ii) studies and development of methodologies in livestock sector (iii) Information Technology (IT) solutions and (iv) Refresher Training on ISS methodology.

1.2 Coverage: The Survey is conducted in the entire rural areas of States/UTs. The survey is targeted to cover around 5% village in every season taking into account a total 15% villages, nearly 960000 villages in a year.

1.3 Period of Survey: The Survey is conducted from March to February. The entire period of one year is divided into three Seasons of 4 months each. These Seasons are:

Name of the Season	Period of survey
Summer Season	1 st March to 30 th June (122 days)
Rainy Season	1 st July to 31 st October (123 days)
Winter Season	1 st November to 28 th or 29 th February (120 days or 121 days in a leap year)

This helps in building up progressive estimates of aggregate as also takes care of seasonality, if any, in the character(s)/Parameters under study.

1.4 Sampling Design & Estimation Procedure: The sampling design is a stratified three stage design with district as stratum. The first stage units are villages, second stage units are households and third and ultimate stage units are animals. The list of villages as per the latest Livestock Census constitutes the sampling frame. For the estimation of livestock numbers, 15% of the villages will be selected (5% in each season) by using Simple Random Sampling Without Replacement (SRSWOR). Nearly 10 villages each will be further selected for detailed study for collection of information on **yield** at the district level. If staff resources are available sample size may be increased further. A detailed instruction manual has been circulated to all States/UTs for selection of sample villages, households and animals along with formulae for calculation of estimates.

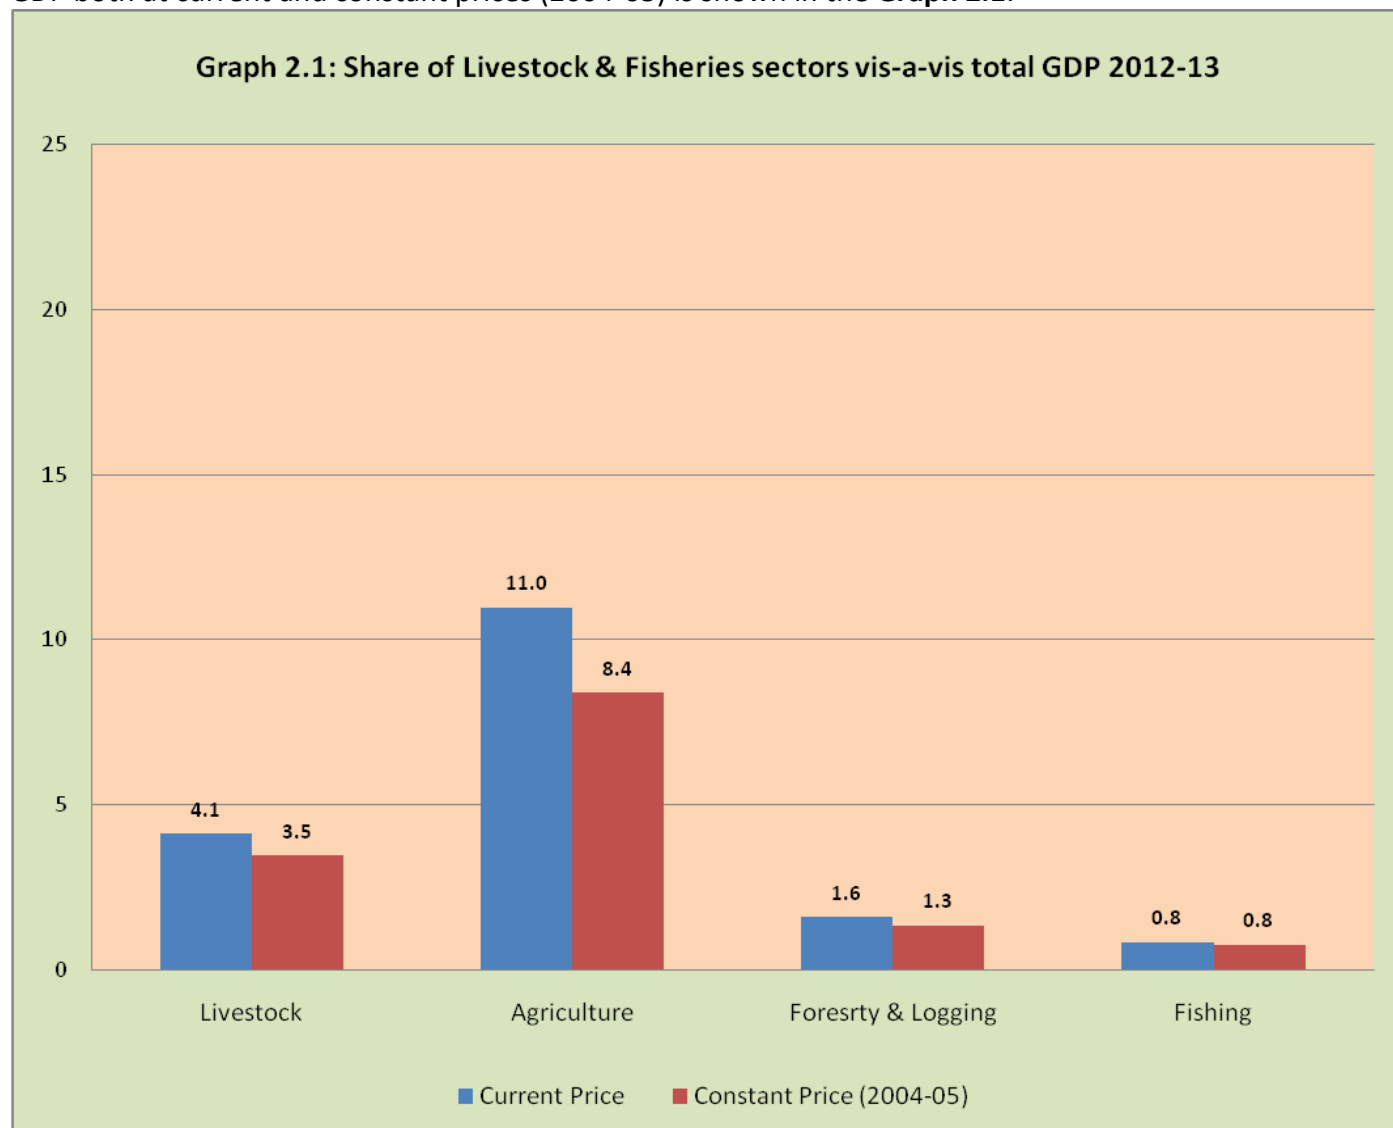

1.5 Human Resources: Financial Assurances have been provided to the States on a sharing basis to States/UTs as mentioned in Para 1.1 for nearly 1334 regular posts. The total positions of the staff deployed under the scheme in various States/UTs are given below:

Post	Sanctioned	In position	Shortfall
Joint Director	23	5	18
Deputy Director	58	12	46
Assistant Director	160	47	113
Supervisor-cum- Data Entry	313	127	186
Enumerators	717	520	197
Computer Operator	63	30	33
Total	1334	741	593

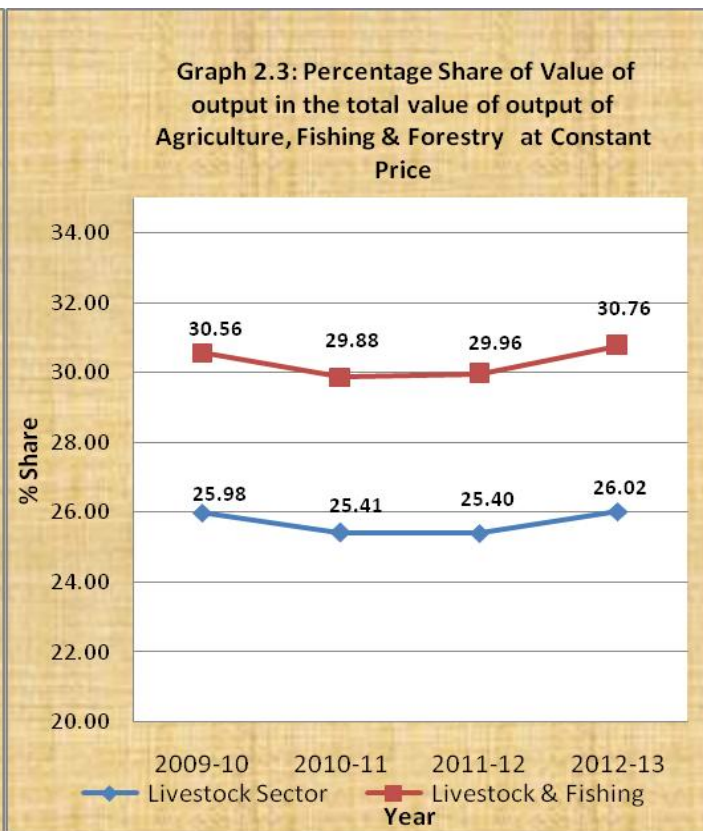

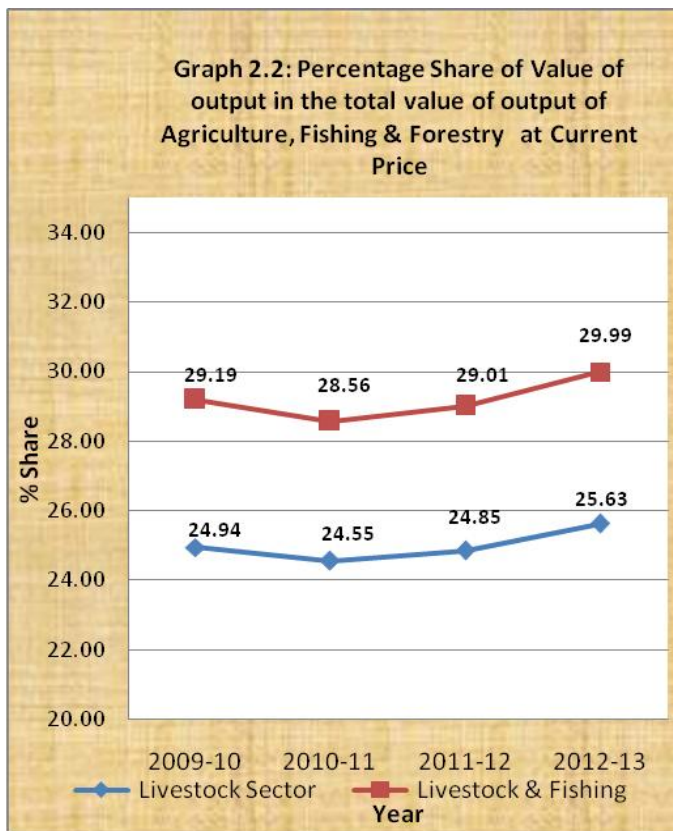

1.6 Technical Committee of Direction for Improvement of Animal Husbandry Statistics (TCD): The scheme Integrated Sample Survey is evaluated every year by the committee viz “Technical Committee of Direction for Improvement of Animal Husbandry Statistics (TCD)” constituted under the Chairmanship of Director General, CSO. The Committee meets at least once in every year to evaluate the progress of the scheme and approve the annual estimates of Major Livestock Products. The recommendations of the committee are implemented by all State Animal Husbandry Departments and Action taken report is submitted to the TCD in its subsequent meeting.

2. Gross Value Output and Gross Domestic Product of Livestock and Fisheries Sectors

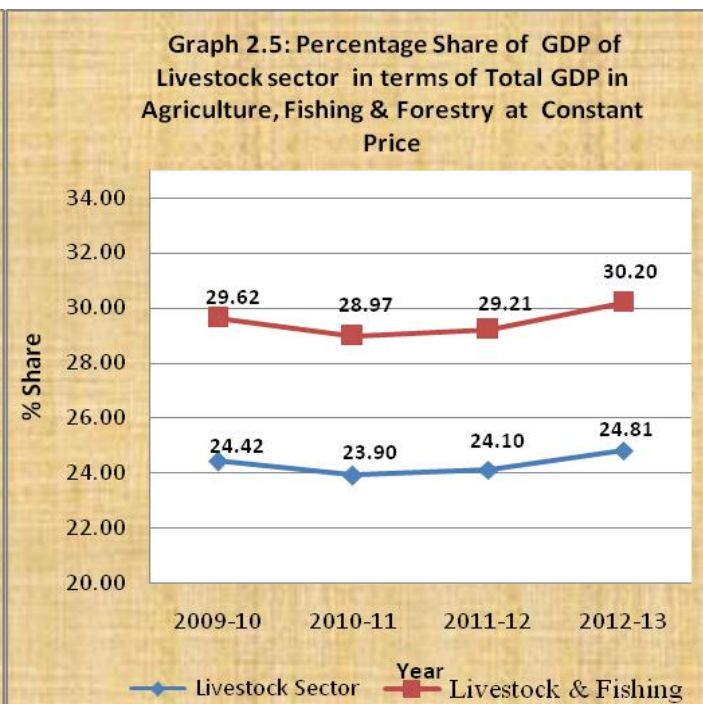

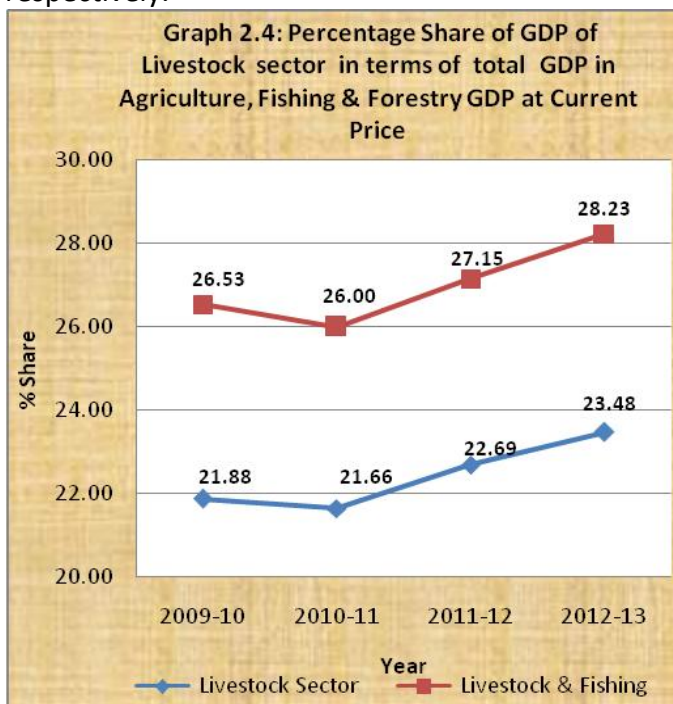

Livestock and fisheries sector play an important role in socio economic development and the national economy of the country. The contribution of these sectors to the national economy in terms of Gross Domestic Product is 4.1% at current prices for livestock sector and 0.8% at current prices for fisheries sector during 2012-13. The share of contribution of all sectors under Agriculture & allied activities to total GDP both at current and constant prices (2004-05) is shown in the **Graph 2.1**.

The percentage Contribution of livestock in terms of Gross Value of Output (GVA) in Agriculture, Fishing & Forestry (AFF) at Current and Constant prices is depicted in the **Graph 2.2 and 2.3**. The share of livestock sector in GVA of total AFF at Current and constant Price has decreased from 24.94% to 24.55% and from 25.98% to 25.41% respectively during 2009-10 to 2010-11 and thereafter increased to 25.63% and 26.02% in 2012-13 respectively. Similarly, the livestock and fisheries together has marginally decline during 2009-10 to 2010-11 and further increased from 28.56% and 29.88% in current and constant price during 2010-11 to 29.99% and 30.76% during 2012-13 respectively.

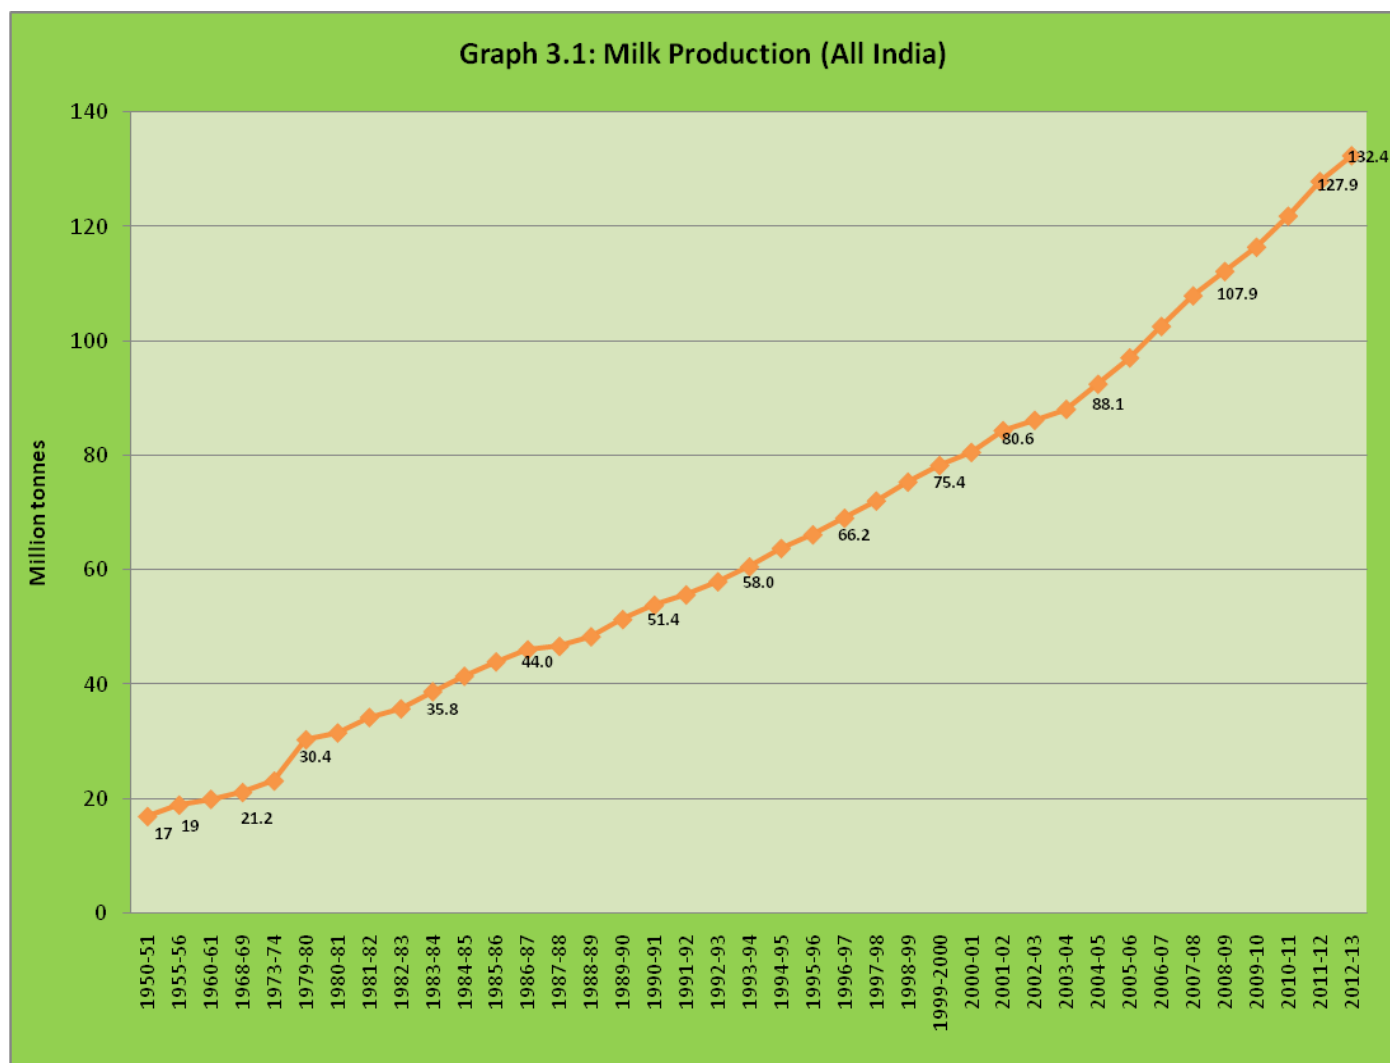

The percentage Contribution of livestock in terms of total Gross Value of Output (GVA) in Agriculture, Fishing & Forestry (AFF) at Current and Constant price is depicted in the **Graph 2.4 and 2.5**. The share of livestock sector in GVA of total AFF at Current and constant Price has decreased during 2009-10 to 2010-11 and further increased from 21.66% and 23.90% in 2010-11 to 23.48% and 24.81% in 2012-13 respectively. Similarly, the livestock and fisheries sectors together have shown marginal decreasing trend during 2009-10 to 2010-11 and thereafter increased from 26.00% and 28.97% in current and constant prices during 2010-11 to 28.23% and 30.20% during 2012-13 respectively.

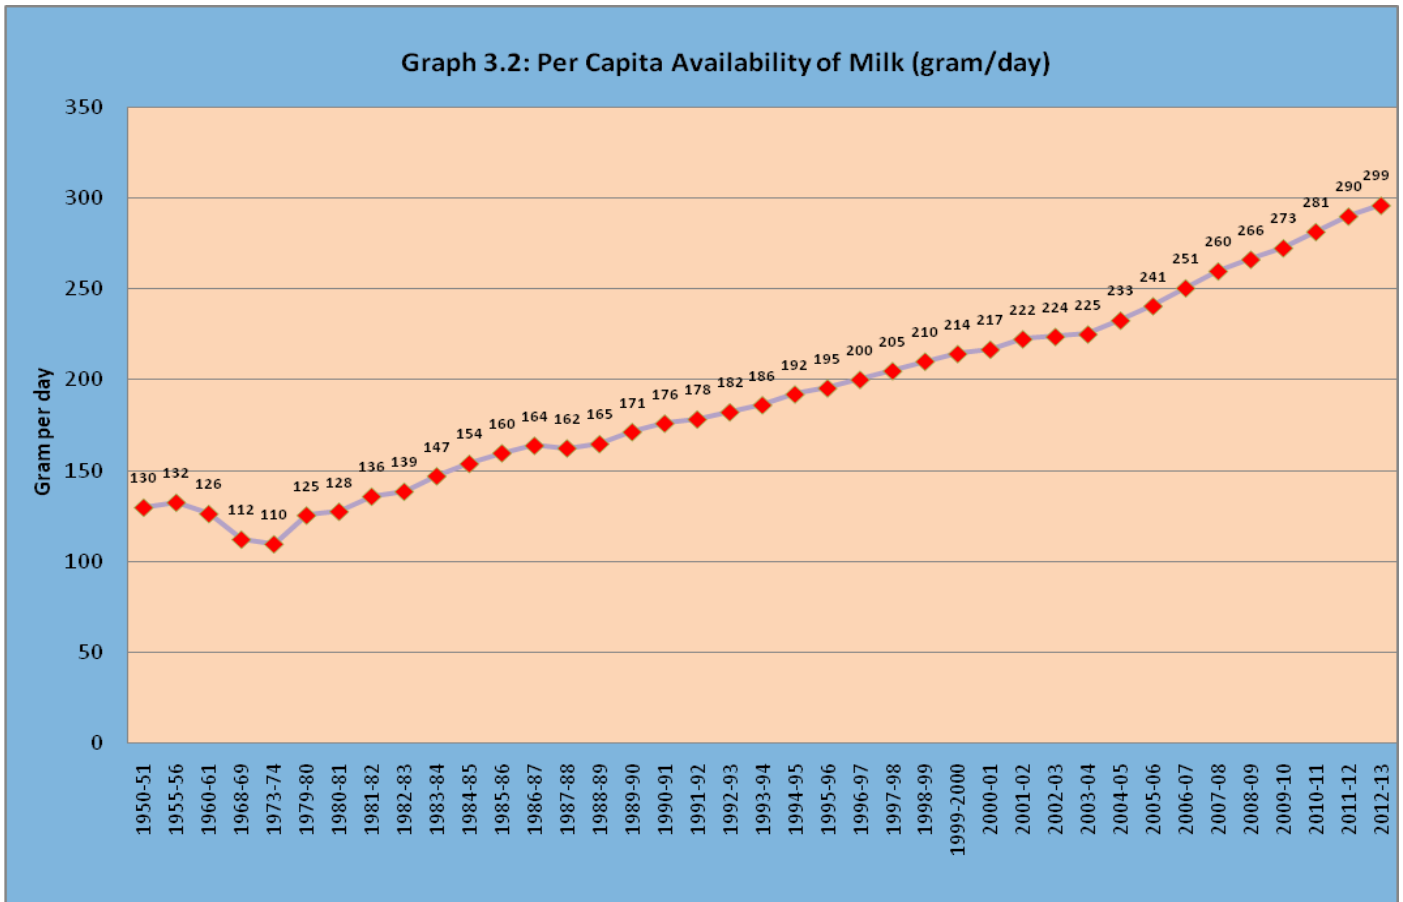

3. Milk Production

Milk and milk products are the essential food items of human beings which provides sufficient nutritional supplements especially to the children. The milk production in the country was 17.0 million tonnes during 1950-51. A number of initiatives under taken by the government helped improving the productivity of milk over the period. A trend showing the increase in milk production over the past three decades is depicted in the **Graph 3.1**. The analysis shows that during the 11th five year Plan (2007-08 to 2011-12), the average annual growth rate of milk production was 4.5%. As a result, the total Milk production during the period has increased from 107.9 million tonnes in 2007-08 to 127.9 million tonnes in 2011-12. At the beginning of 12th five year Plan i.e. (2012-13), the total Milk production was 132.4 million tonnes. The milk production increased from 127.9 million tonnes in 2011-12 to 132.4 in 2012-13 registering a growth of 3.5%.

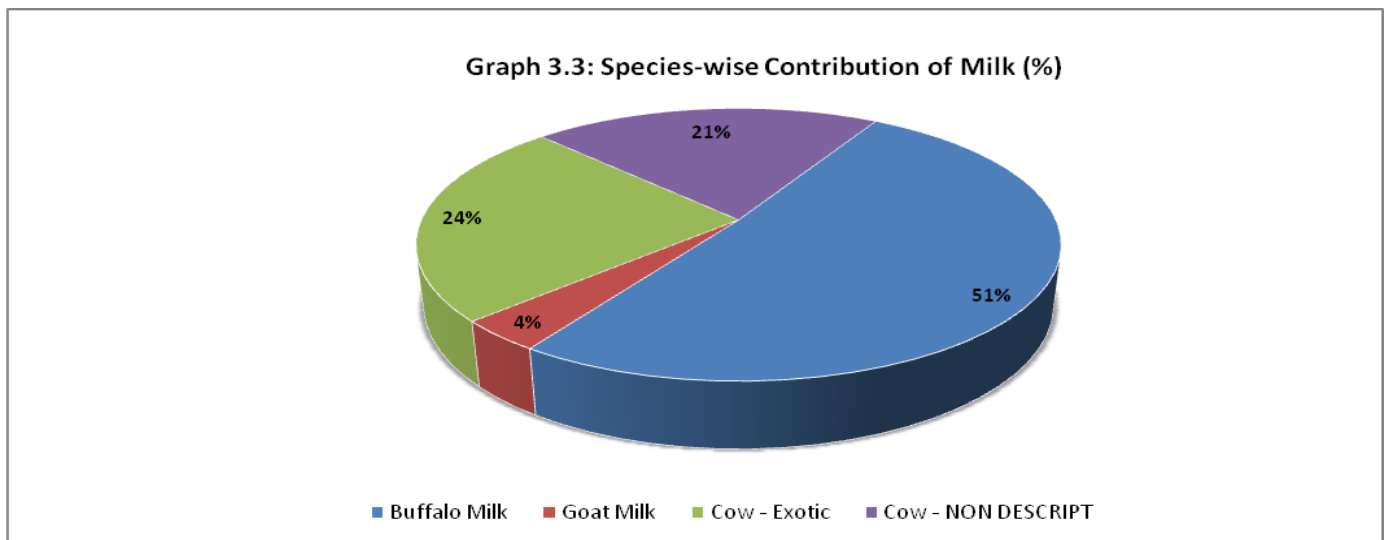

The per capita availability of milk was at 130 gm/day in 1950-51. There has been steady increase in per capita availability of milk since 1973-74 with a marginal fluctuation in the intermittent periods. However the per capita availability has sharply increased from 225 gm per day in 2003-04 to 299 gm per day in 2012-13 with an average annual growth rate of 2.7 % as illustrated in the **Graph 3.2**.

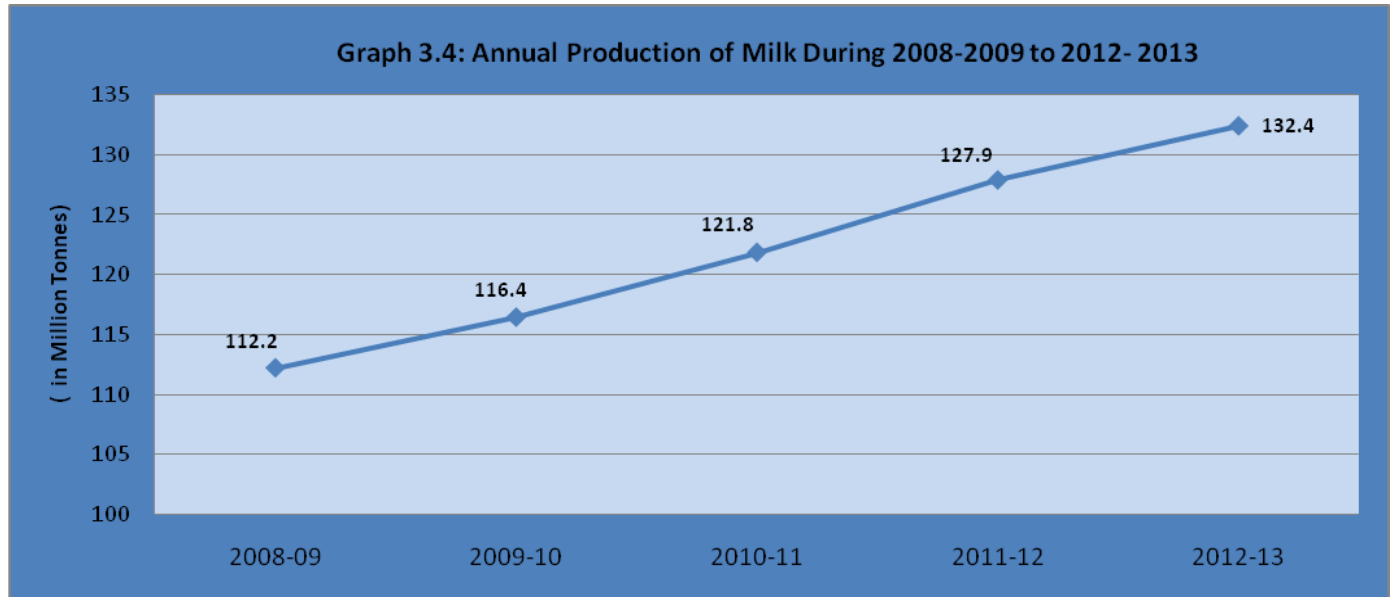

The analysis shows that during the 11th five year plan (2007-08 to 2011-12) the per capita availability of milk increased from 260 gm/day to 290 gm/day. In the beginning of 12th five year Plan i.e. (2012-13), the per capita availability of milk is 299 gm/day. The graph indicates gradual incremental increase in per capita availability of milk in Xth to XIIth five year plans.

Milk Contribution by Cattle, Buffalo and Goat

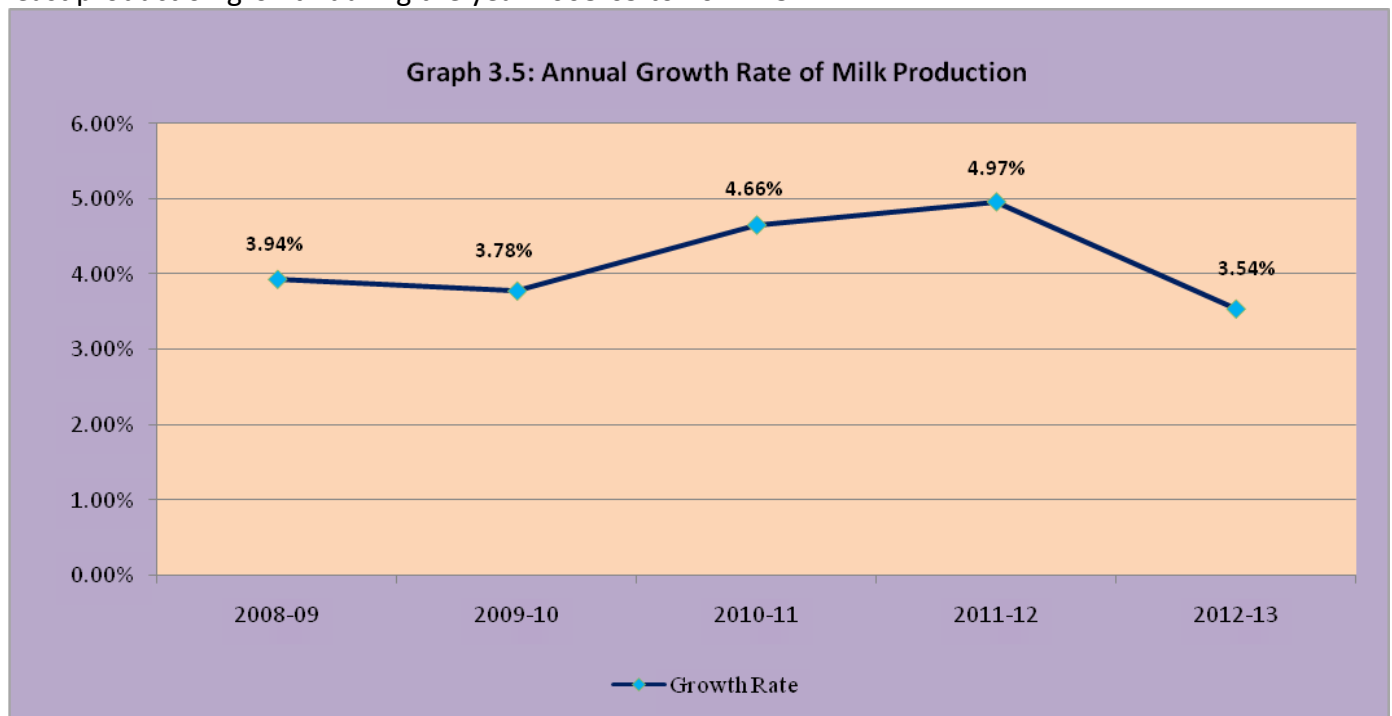

A **Graph 3.3** shows the contribution of milk production by Cattle, Buffalo and Goat. The analysis shows nearly 51% of milk production is contributed by Buffalo followed by 24%, 21% and 4% for Cow Exotic/Crossbred, Cow Non-Descript and Goats respectively.

Graph 3.4 below indicates, the production of milk rose from 112.2 million tonnes in 2008-09 to 132.4 million tonnes in 2012-13.

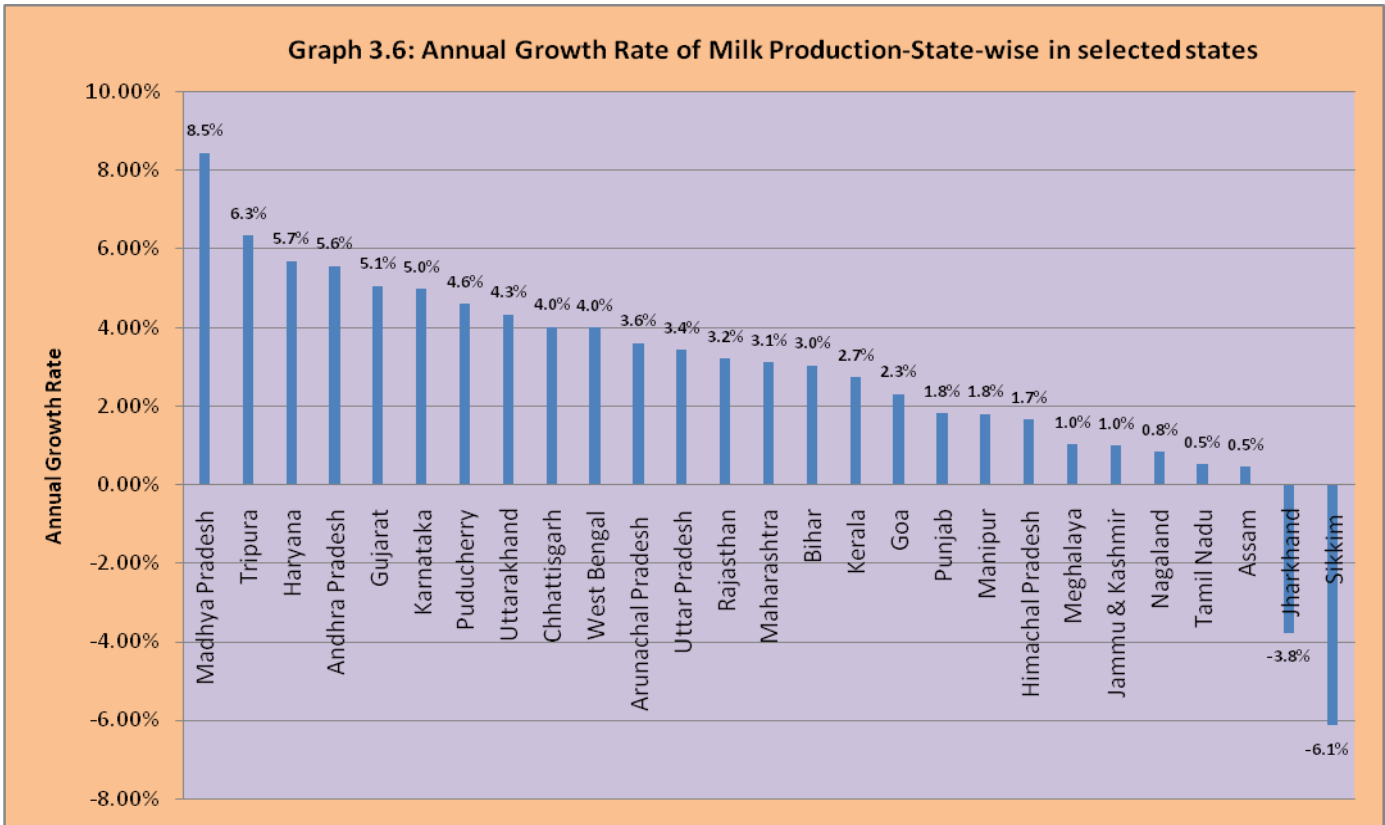

From **Graph 3.5** below shows the growth in milk production during the period 2011-12 to 2012-13. The growth in milk production has decreased from 4.97% in 2011-12 to 3.54% in 2012-13 which was the least production growth during the year 2008-09 to 2012-13.

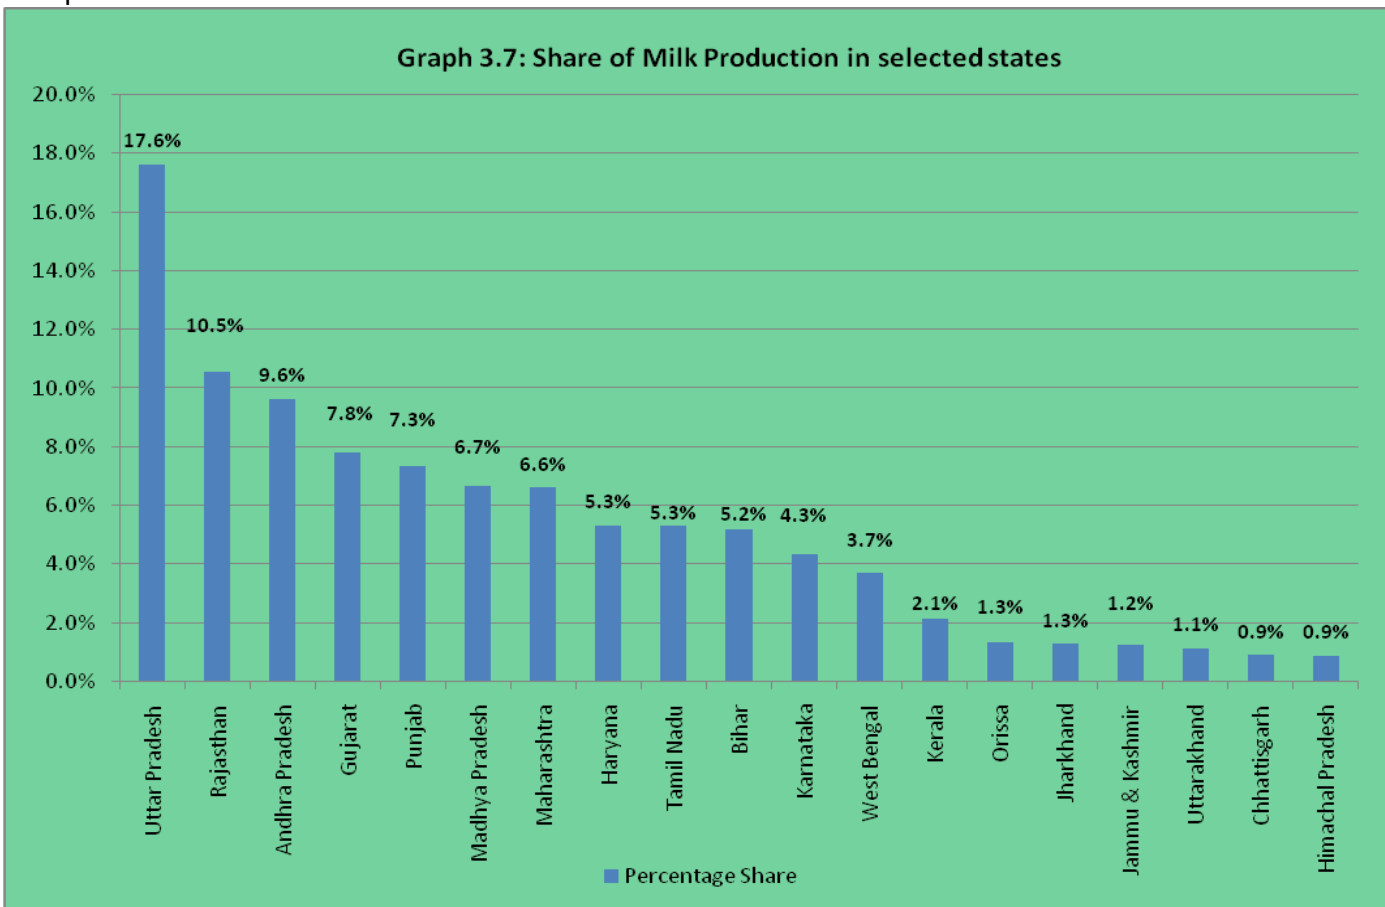

The state-wise variation in the growth rate in production of milk for the year 2012-13 is reflected in **Graph 3.6** for selected States. Madhya Pradesh state has the highest growth rate of 8.5% in the year 2012-13 as compared to the year 2011-12 while the lowest positive growth rate 0.5% was registered in the state of Tamil Nadu & Assam. Tripura state has achieved the second highest positive growth rate of 6.3% while Haryana has achieved third highest positive growth rate of 5.7%. Among the States, Jharkhand and Sikkim had registered a negative growth rate of -3.8% and -6.1% respectively in the production of milk during 2012-13.

Tamil Nadu is the largest producer of Exotic/crossbred cow milk in the country with 5.58 million tonnes followed by Maharashtra with 3.42 million tonnes. The state of Uttar Pradesh is the largest producer of Indigenous cow milk with estimated production of 4.24 million tonnes followed by Rajasthan with 4.08 million tonnes.

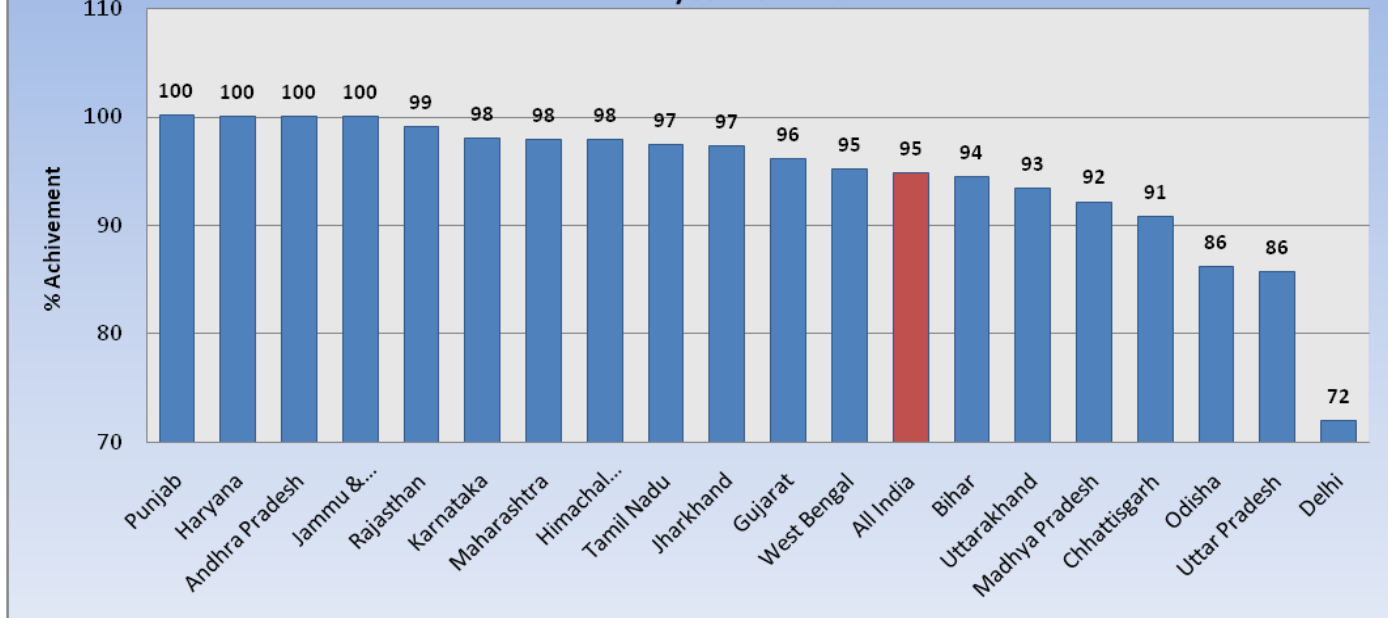

In the country, the milk production is largely contributed by the buffalo. A **Graph 3.11** reflects buffalo milk production in the country. Buffalo milk production predominates in the states like Uttar Pradesh, Andhra Pradesh, Rajasthan, Punjab, Haryana, Gujarat, Madhya Pradesh and Maharashtra with highest buffalo milk production of 16.18 million tonnes by Uttar Pradesh.

4. Egg Production

Poultry development is one of the important activities in livestock sector. The total egg production in the country was at 1832 million in the year 1950-51 and since then the production of egg continues to rise over the period, as depicted in **Graph 4.1**. As can be observed in the graph, there is a steady increase in production of egg upto the year 1999-2000. From the year 1999-2000 onwards the production of egg improved substantially and it reached 69731 million numbers in the year 2012-13.

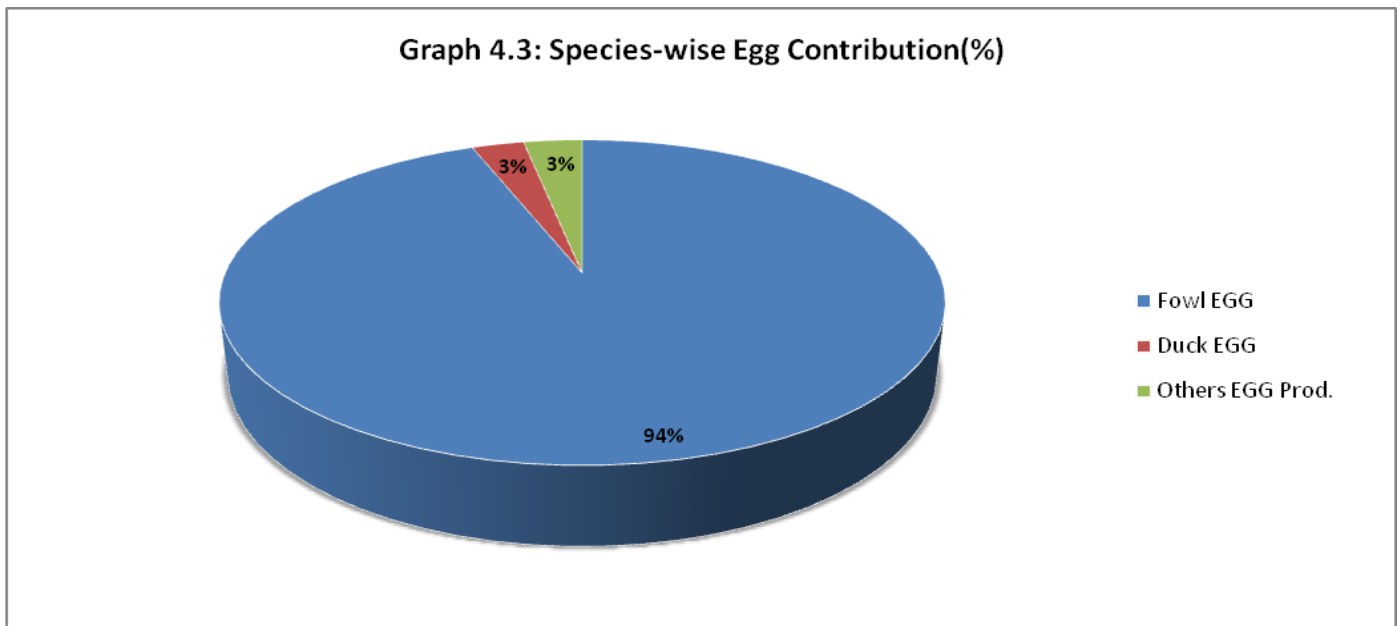

The per capita availability of egg was 5 eggs per annum during the period 1950-56. There has been steady increase in per capita availability of egg since then till 1979-80 with marginal fluctuations in the intermittent periods. There has been sudden jump in the per capita availability of egg in the year 2000-01 which registered 36 eggs per annum from 30 eggs per annum in the year 1999-2000 as depicted in **Graph 4.2**. Thereafter from 2000-01 to 2003-04, there is a marginal increase in the per capita availability of egg and further there is a substantially increasing trend has been observed in the per capita availability of eggs from 2004-05 to 2012-13. As a result, the per capita availability of eggs reached 58 eggs per annum in the year 2012-13.

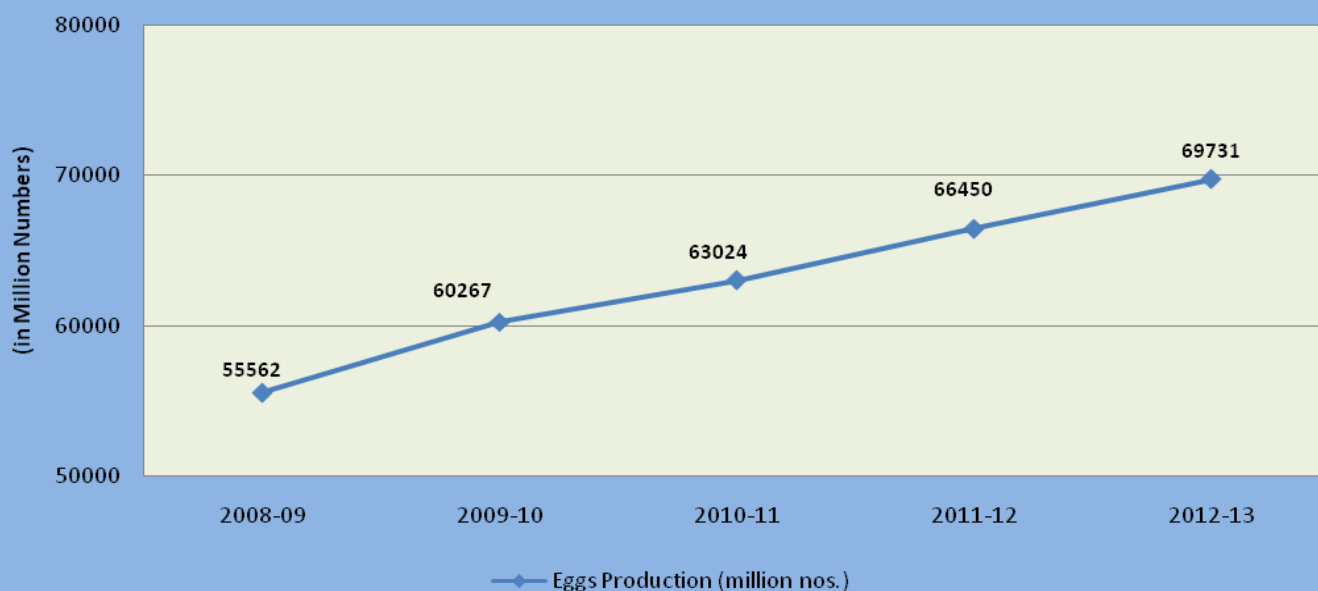

Production by Fowl and Duck

A diagram showing the contribution of egg production by Fowl, Duck and Others is given below. The analysis showing nearly 94% of the production of egg is contributed by Fowl followed by Duck and Other poultry birds which contributes 3% and 3% respectively.

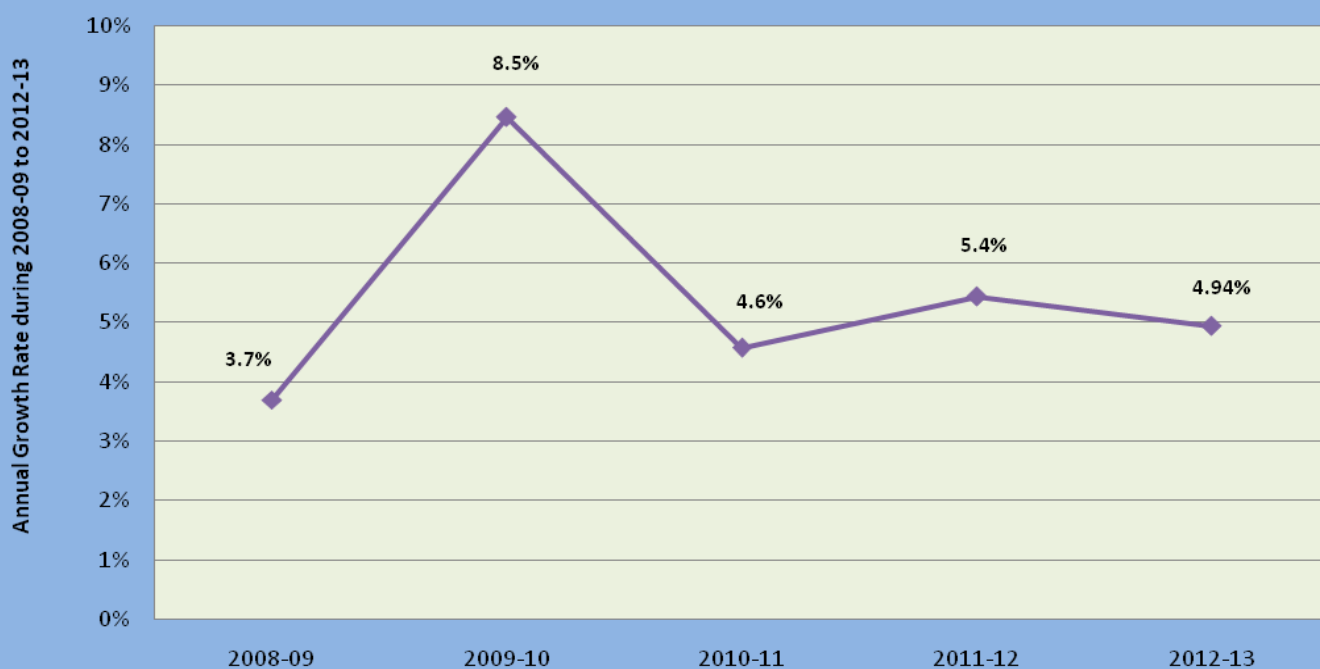

There has been a significant change in production of egg during the year 2008-09 to 2012-13 which can be seen in **Graph 4.4 and Graph 4.5**. The production of egg rose from 55562 million to 69731 million with an average annual growth rate of 5.4% during the year 2008-09 to 2012-13. However, the growth rate registered 4.9% during the year 2012-13.

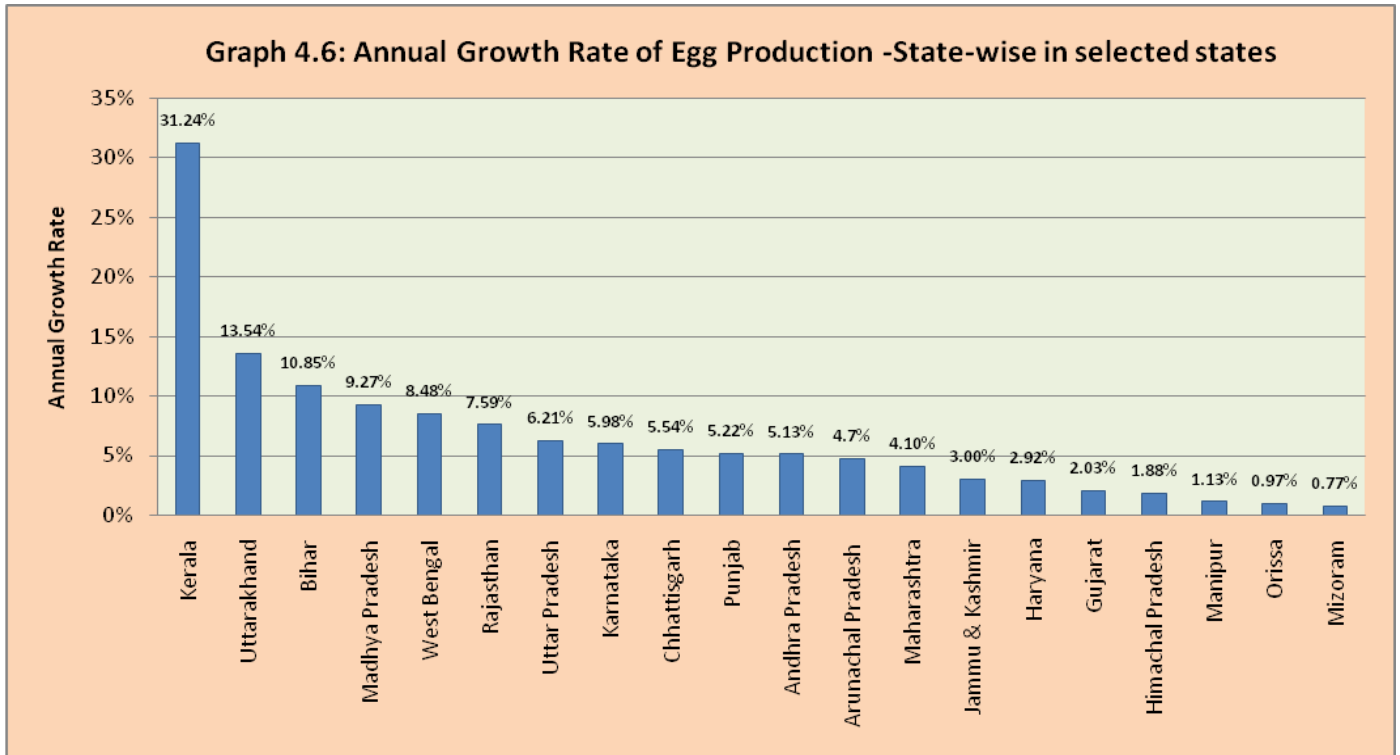

Graph 4.5: Growth Rate of Egg Production

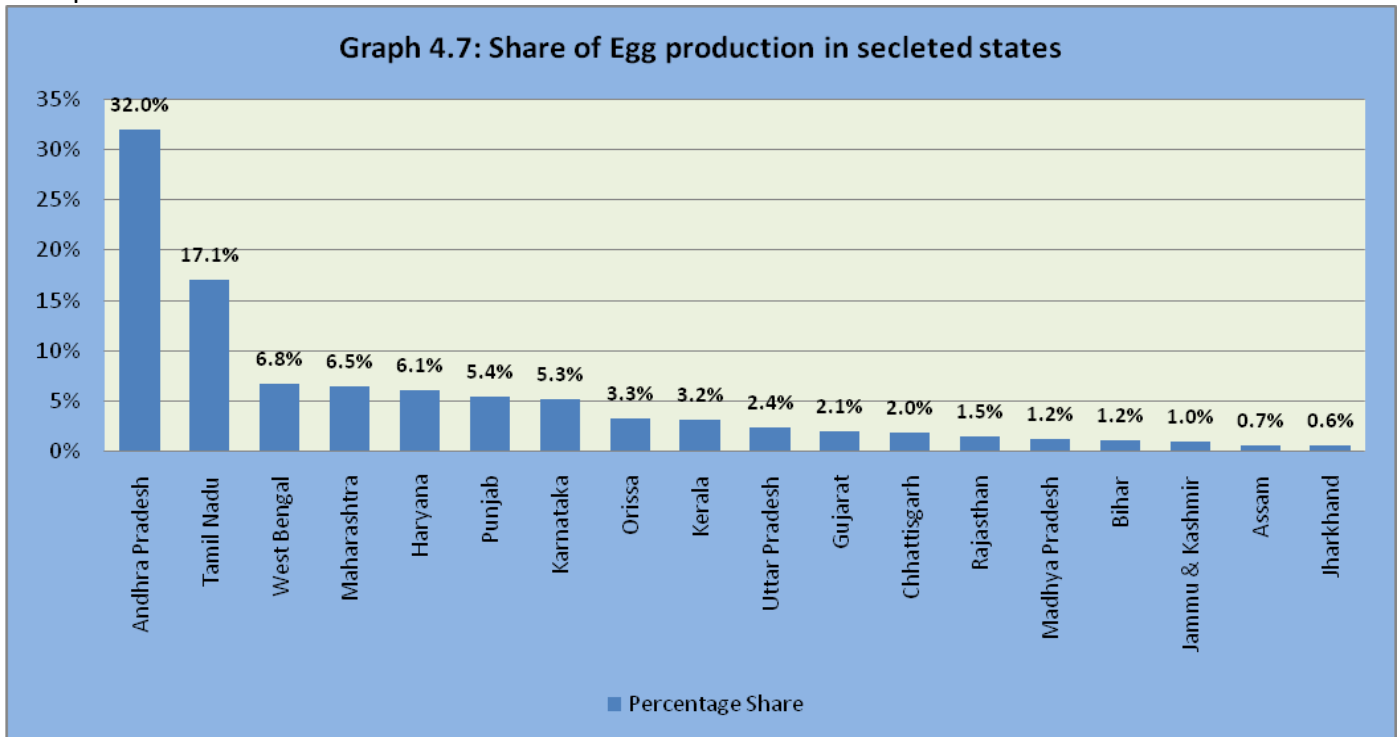

In **Graph 4.6**, during the year 2012-13, most of the states have positive variations in their growth rate of egg production over the previous year. There are states like Bihar, Kerala and Uttarakhand which have registered more than 10% annual growth rate in the 2012-13. Kerala was the highest growth rate achiever among the States/UTs in the year 2012-13 with annual growth rate of 31.2% followed by Uttarakhand and Bihar with annual growth rate of 13.6% and 10.8% respectively.

Notes

1 In working 'Decadal Growth and 'Percentage Growth'. For India 1941-51 and 1951-61 the population of Tuensang district for 1951 (7.25) and the population of Tuensang (83,501) and Mon (5,774) districts for 1961 Census of Nagaland state have not been taken into account as the area were censused for the first time in 1951 and the same are not comparable.

1. In 1981, census was not conducted in Assam, Based on the 1971 results and the final 1991 census the population of Assam as on March 1, 1981 has been interpolated.

2. The 1991 census has not been conducted in Jammu & Kashmir. Hence the population figures for India include the population figure for J & K projected by the Standing Committee of Experts on population projections (October, 1989)

3. Includes estimated population of Paomata, Mao Maram and Purul sub-divisions of Senapati District of Manipur for 2001.

4. The percentage decadal growth show in column 4 of Statement 2 indicates a decline from 24.80 percent during the decade 1961-71 to 24.66 percent during the decade 1971-81, while the average annual exponential growth rate presented in column 7 of this statement shows an increase from 2.20 to 2.22. This is because the percent decadal variation has not been adjusted for the shift in reference data in 1971. The decadal variation for 1961-71 related to 121 months while that 1971-81 relates to 119 months. If we adjust for the difference, the percentage decadal growth works out to 24.59 percent for 1961-71 and 24.87 percent for the decade 1971-81.

5. The 1971 census was conducted with 1 April, 1971 as the reference date. In both the 1961 and 1981 censuses the reference date was 1 March. The average annual exponential growth rate presented in the statement takes into account this difference. No such adjustment has been made while calculating decadal growth rate.

6. In Arunachal Pradesh the census was conducted for the first time in 1961. While working out the decadal growth, both absolute as well as per cent for 1951- 61, 1961 census population of Arunachal Pradesh has been excluded.

* Census figures are provisional.
